

# INNOVATIVE. PRECISE. INDIVIDUAL.

SCHLIESSMEYER GmbH has been operating for more than 50 years as a successful supplier to prestigious customers in the automotive, aviation, mechanical engineering, household appliances, construction and agricultural machinery, medical technology and packaging sectors.

As a full-service provider, we take care of all stages of the value chain from planning through to the finished product ready for sale: this includes concept development, industrial design and product development, designing equipment and control means, mold making and special-purpose machinery engineering, packaging development through to series production.

We secure a clear competitive advantage for our customers with first-class technologies, convincing innovations and targeted investments. International mold purchasing combined with our own moldmaking delivers high quality at competitive prices.

With SCHLIESSMEYER you have a flexible, reliable and dedicated partner.

**SCHLIESSMEYER**   
Kunststoff – Gut in Form

1

**Professional advice**  
by adapted experts  
for guaranteed  
function of  
components

2

**Engineering**  
economical and  
high quality  
plastics solutions

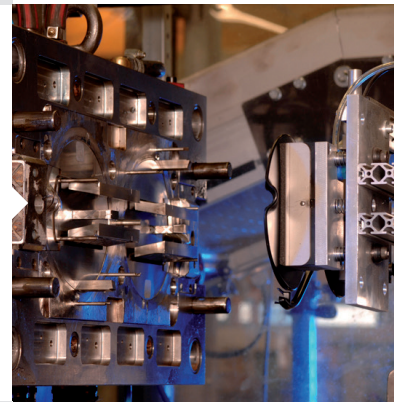

3

**Construction**  
CAD-based  
with mold-flow  
analysis

4

**Mold shop**  
in-house with  
latest technology  
and qualified  
toolmakers

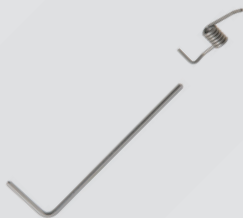

5

**Procurement**  
of additional  
components  
International Mold  
Sourcing

6

**Series production**  
injection molding  
components up to  
3,500 g clamping force  
up to 10,000 kN

7

**Assembly**  
drilling, screwing, glueing,  
clipping, decoration,  
embedding of thread inserts,  
ultrasonic welding, manuall  
& automatic assembly

8

**Logistics**  
product specific  
packaging and  
delivery on schedule
